## HARCOURT

*A legend,*

*A castle,*

*A feast in France,*

*From dreams to contemporary exceptional moments.*

*The Harcourt glass, absolute hero of an eternal modernity.*

Glass of the Princes and leaders of the World, it was commissioned by Emperor Napoleon III in 1851. Since then, it has continued to reign on the most prestigious tables in the world. Its imposing aesthetic has inspired many contemporary designers: vases, lamps, coffee cups, decorative objects and jewelry make up the great Harcourt family of today.

A unique silhouette: hexagonal base, cup with six facets playing with light. As beautiful to look at as it is to touch, its weight gives it nobility, the crystal clear sound, lightness.
